Dear valued patient,

The physicians at Pioneer Physicians Network want you to know that we are here for you through this Covid-19 challenge. We have and will stay at our posts for all of your medical concerns.

Call us first. We can help you navigate the healthcare system. We will assist you in deciding whether you need an in-office visit, video visit, or emergency department visit. We want to keep you safe.

Appropriately, much of the focus of the healthcare system has been on avoiding and controlling the Covid outbreak. Social distancing has been very successful in preventing our hospitals from being overrun. We, as your primary care physicians, remain concerned about all of your acute and chronic health conditions.

We are here for you. To assure that we don't neglect your non-Covid issues, we are offering safe in-office visits. We encourage you to visit the offices for your chronic disease management appointments (including bloodwork) and for acute problems. Our ability to manage your health is greatly enhanced by our physical presence with you. We have made our offices safe by embracing social distancing, disinfecting, staff monitoring and proper personal protective equipment. We have arranged our schedules so that ill patients will be seen at special times so that they can be kept separate from well patients. Waiting room distancing is enforced. Alternatively, you can wait in your car in the parking lot and we will call you when you are ready to be roomed. All staff members that you interact with will be wearing a mask. We disinfect all areas between patients.

If you are unable or advised not to come to the office, we offer video visits. This is a new care approach for the physicians and for patients. We know that new technologies can be confusing, so please call your physician's office and we will be happy to guide you to a successful video visit.

When testing supplies become available, we hope to be able to provide you with viral and antibody testing. This will help us to accurately guide your health choices. We will contact you as soon as we can arrange for testing. We also will research currently available testing and inform you on its' accuracy.

As always, we are pleased and extremely grateful that we are able to continue caring for you, your families and our community. Our relationship with you will continue through all of life's challenges.

In health,

Gary Pinta MD
President, Pioneer Physicians Network
